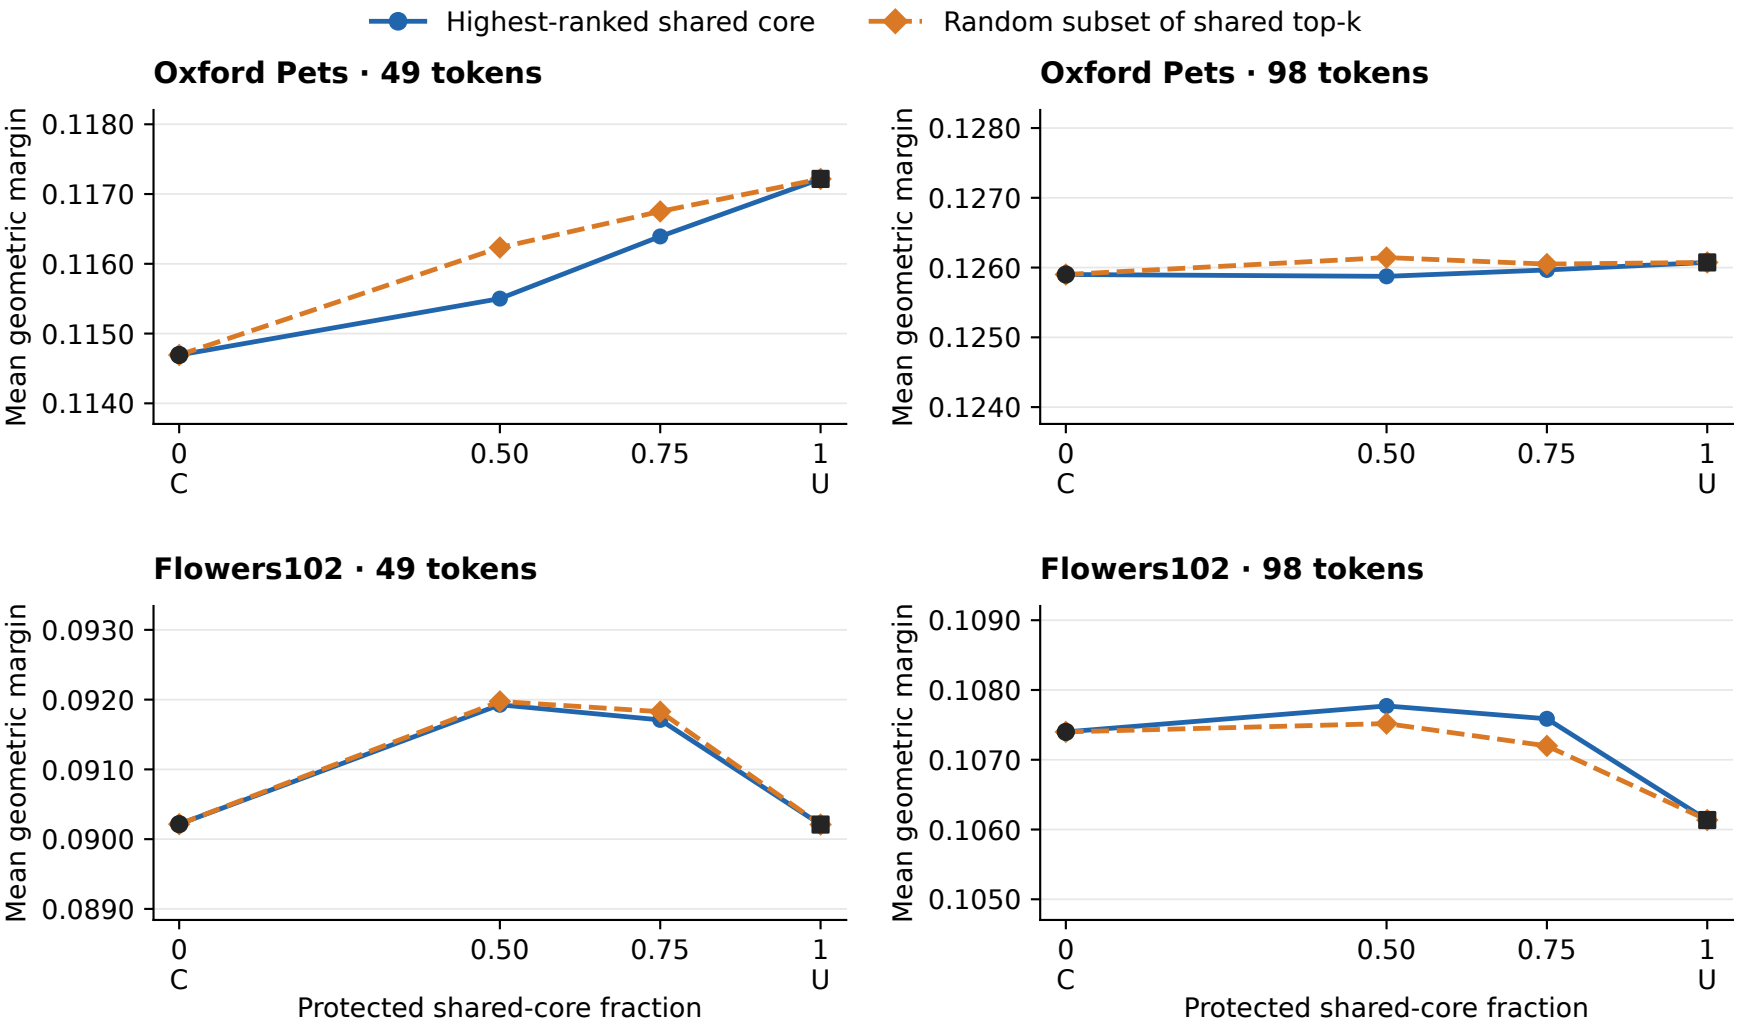
Shared core + task-specific fill

Frozen CLIP ViT-B/16 · block 6 · fixed token count within each panel



C: original conditioned selector; U: wide image-only selector. The remaining slots follow C's ranking.
Means over 3 paired training seeds; random cores also average 3 mask seeds. Fractions round down to tokens.
All y-axis windows span 0.0045; absolute levels differ. Curves show means, not confidence intervals.
Pets98 and Flowers49 complete the exploratory 2×2 extension of the initial Pets49 / Flowers98 pilot.
