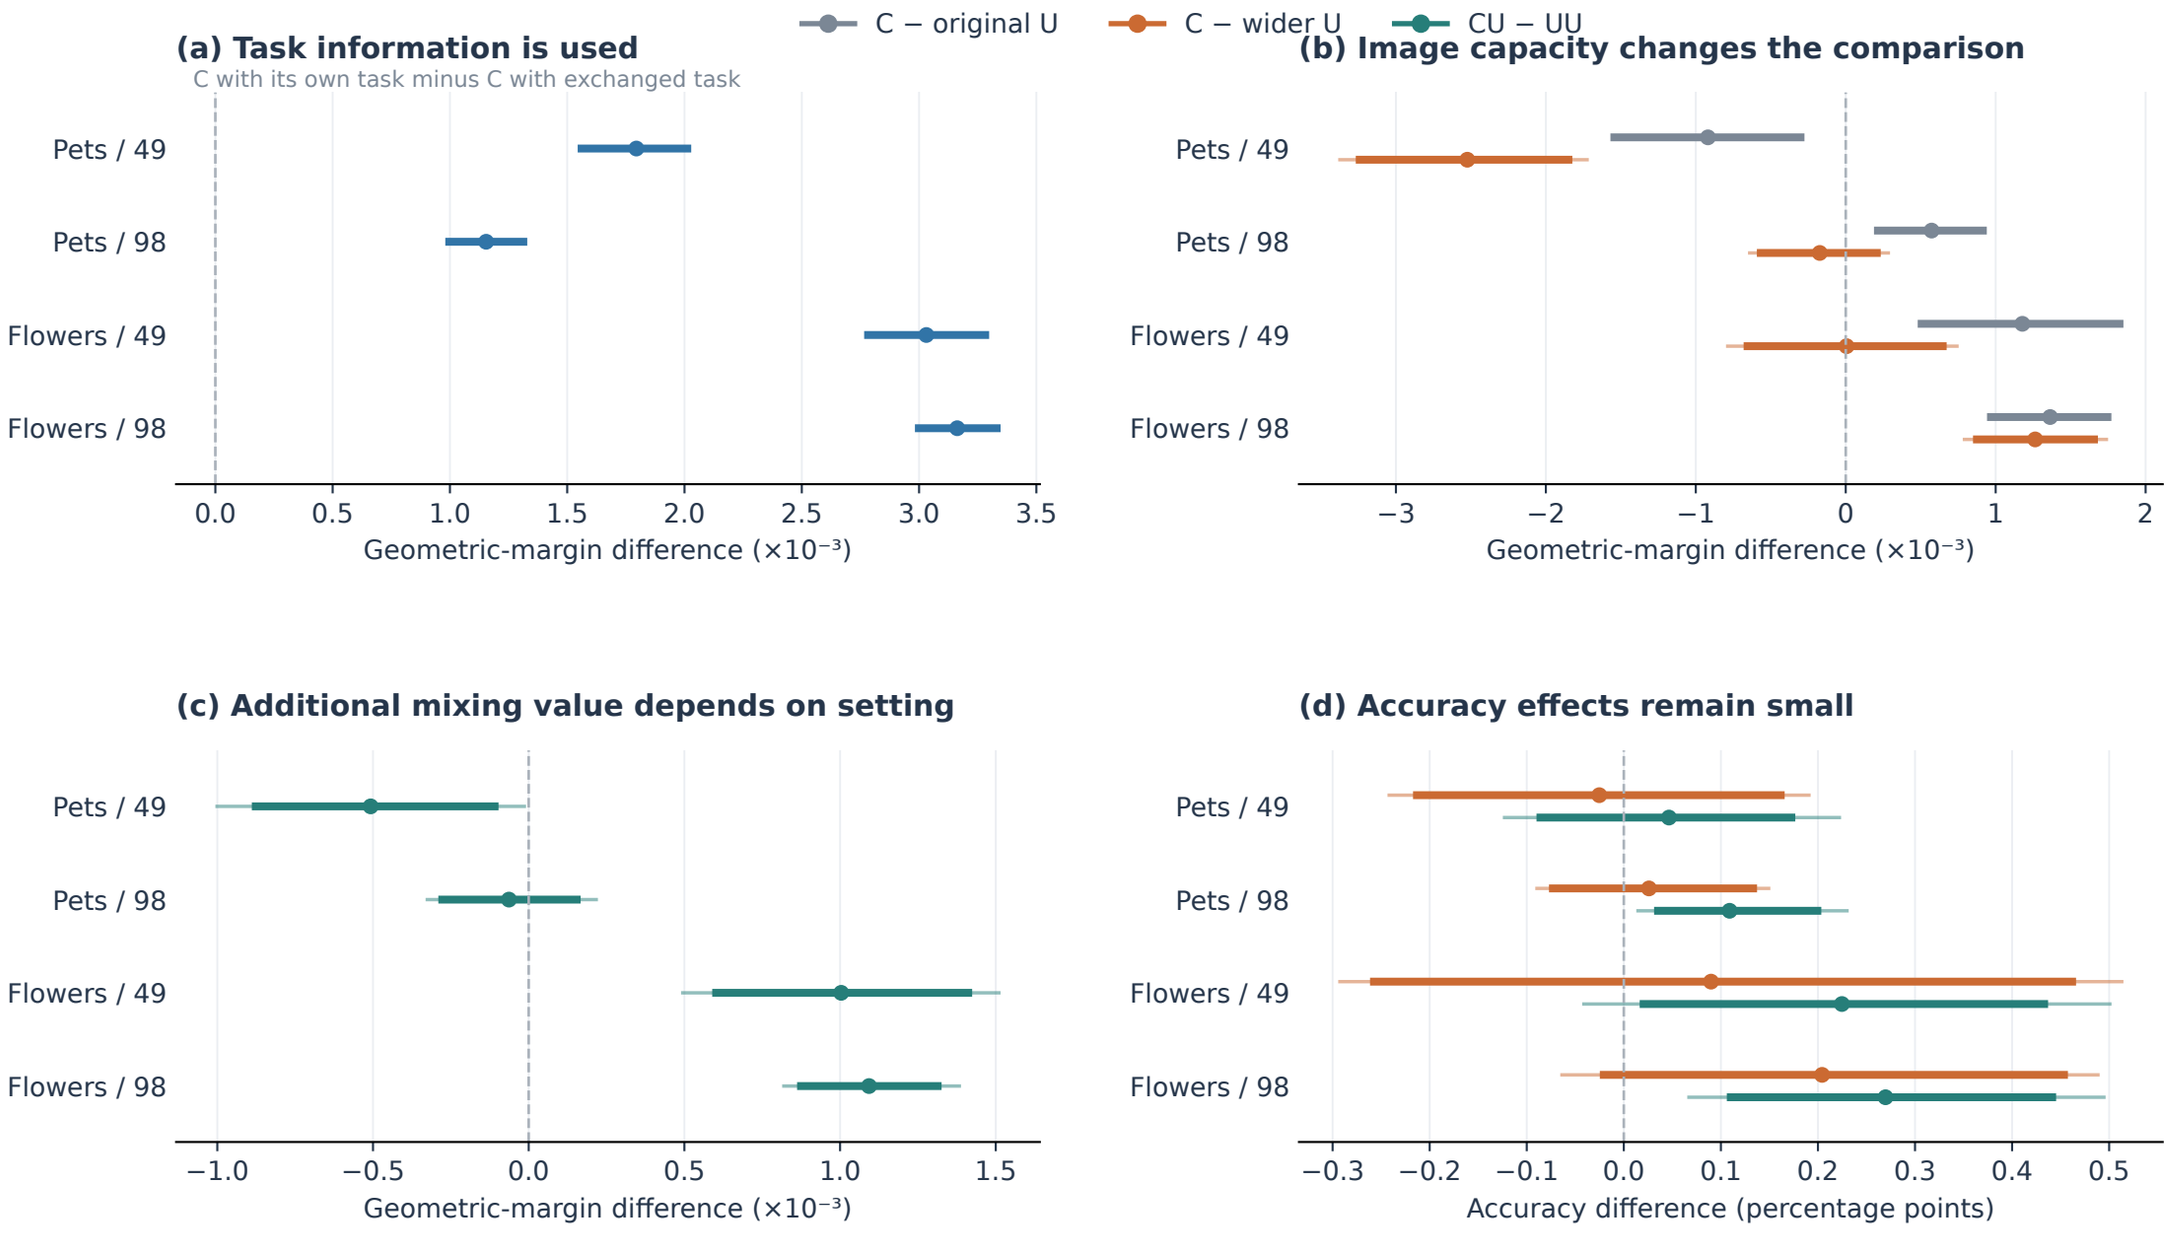
Task utilization and value over shared selection are different questions



Frozen CLIP ViT-B/16; prune after block 6; 49 or 98 retained patches. C = conditioned; U = shared image-only.
Development images and unseen class combinations. Points average three seeds (C/U) or six ordered seed pairs (CU/UU).
Thick bars: 95% image-bootstrap intervals. Thin bars: original adjustments (C−wider U: 2 budgets; CU−UU: 4 settings).
