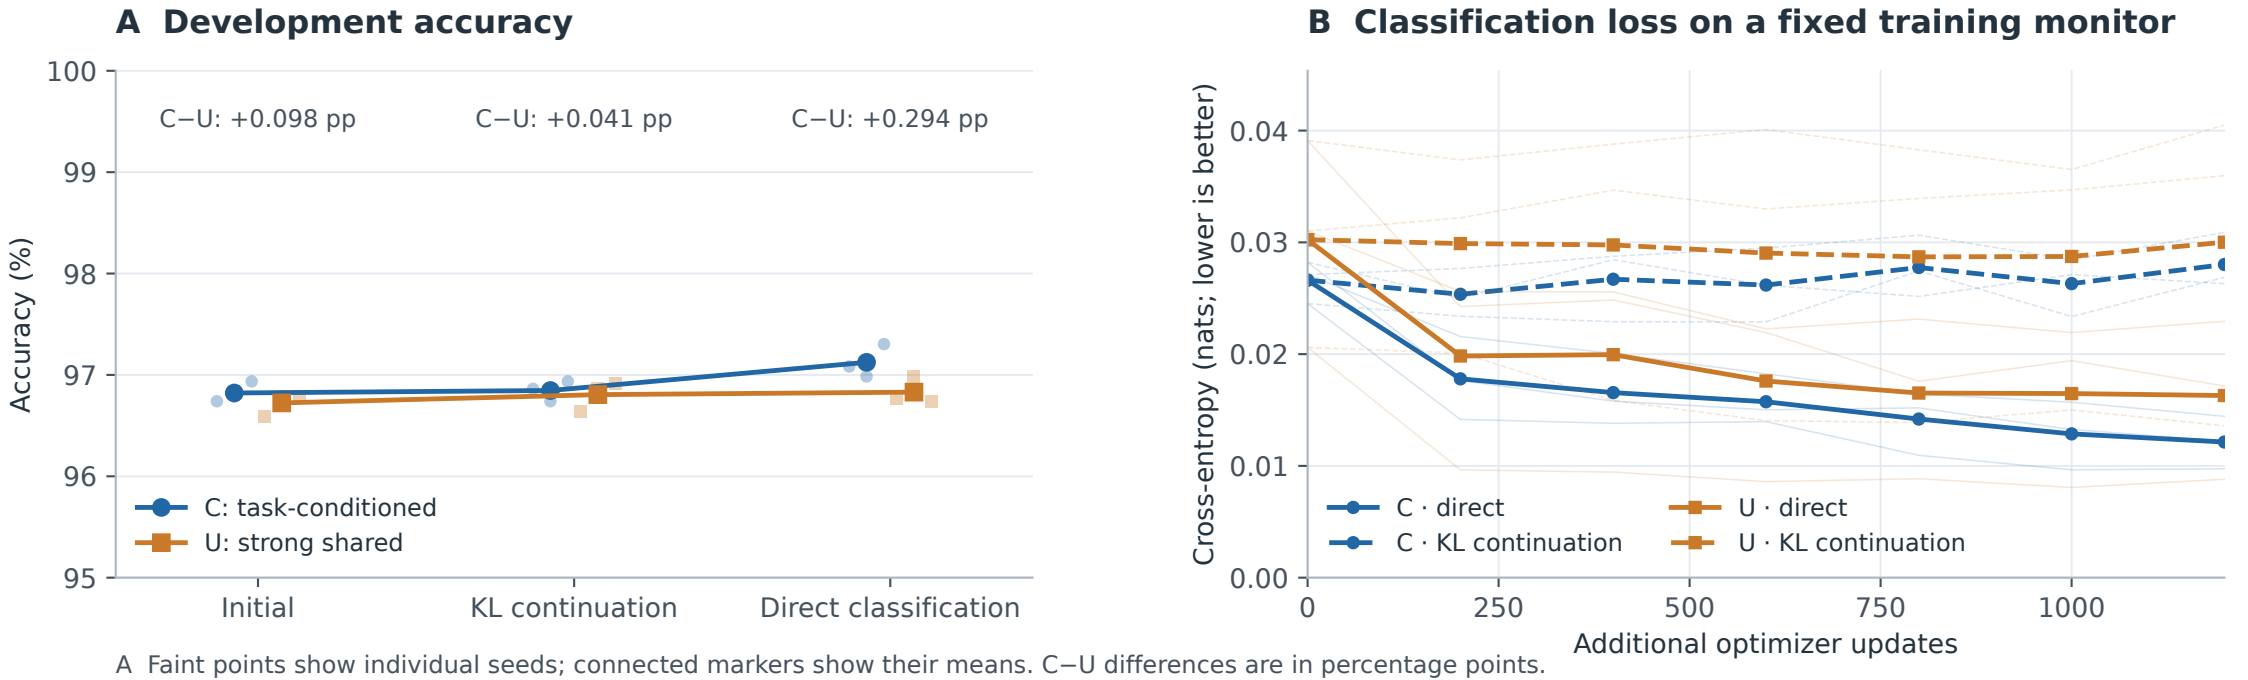
Direct classification training vs KL continuation

Flowers102 · CLIP B/16 · block 6 · 49 tokens · 3 fixed seeds · 1,200 extra updates



A Faint points show individual seeds; connected markers show their means. C−U differences are in percentage points.

B CE uses the same fixed training-monitor examples within each seed, evaluated with native hard token deletion. Thin curves show seeds; bold curves show means. Lines connect saved monitor evaluations, not batch-loss averages.
